

Outer shell Earthing crown Insulator

: Bronze (UNS C54400) : PEEK

Female contact Clip

Locking washer

Other metallic parts

: Brass (UNS C38500)

: Bronze (UNS C54400) : Cu-Be (UNS C17200)

: Bronze (UNS C52100) : Brass (UNS C38500)

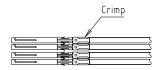

Chrome plated (FS-QQ-C-320B) Nickel plated (FS-QQ-N-290A)

Gold plated (ISO 4523)

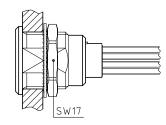

Nickel plated (FS-QQ-N-290A) Nickel plated (FS-QQ-N-290A)

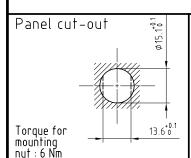

2. Fix the positioner on the crimping tool and set selector to the number corresponding to the conductor AWG as indicated on the positioner label Fit conductor into the contacts and make sure it is visible through its inspection hole in the crimp barrel . Open crimping tool then push contac \bar{t} fully into positioner and complete one crimping cycle. Remove from crimping tool and check that conductor is secure in contact and shows in inspection hole.

3. Drill the panel hole and install the connector with the appropriate tool . Slide crimped contact-conductor combinations according to the insulator marking , avoiding twisting of the conductors . Fit the contacts gently into the insulator and verify that no conductors are crossed before pushing them in completely. Check that all contacts hold in the insulator by verifying their alignement at the front of the insulator and they should remain in position when each conductor is given a gentle pull. Check that retention of the contact is correct with the recommended test tool.

ETUDE N°

Crimping tool : DPC.91.701.V
Extractor : DCF.91.090.2LT
Female contact : EGG.2B.660.ZZM
Female positioner : DCE.91.092.BVM
Female retention testing tool : DCK.91.091.4LRM

: DCA.91.231.7TN or Spanner for nut Spanner for nut : DCG.91.231.7TN

Fixed socket with nut fix	king , with key (G) ,
with extended insulator	•
Series 2B , multipole (10)
