

# **3G SERBAL™**

## **3G HD/SDI-TO-FIBRE CONVERTER**

**4K VIDEO  
COMPATIBLE**

### **3G SERBAL™ - SMPTE Electrical Reconfigurable Bidirectional Alternative Link**

#### **4 channel Coax-to-fibre media Converter**

The LEMO 3G SERBAL™ is a 4 channel multiplexer that makes 3G/HD-SDI to fibre conversion possible.

The 3G SERBAL™ is a compact conversion unit which allows output from up to 4 cameras to be transmitted over a single standard LEMO 3K.93C SMPTE cable.

The optical multiplexers of the 3G SERBAL™ use Wavelength Division Multiplexing (WDM).

Each signal within a fibre has a different optical wave length, enabling interference free transmission over longer distances than copper cabling.

The system automatically senses video signals, each channel can be defined as an input or output, allowing four channels of 3G/HD-SDI to be used in either direction. It is possible to transmit 4K video using this system.

## Technical characteristics

Characteristics		Values
Transmission wavelength (nm)		1510 / 1530 / 1550 / 1570
Cable	Hybrid 2 fibres 9/125	SMPTE 311 2 fibres single mode cable
Optical connector		LEMO 3K.93C
Electrical coax connector		BNC 75
Optical launch power		0 dB Typ.
Optical receiver sensitivity		-22 dBm (SMPTE 259M 270 Mbps) -22 dBm (SMPTE 292M 1.485 Gbps) -19 dBm (SMPTE 424M 2.97 Gbps)
Temperature range		-30°C to +55°C
Humidity range		Up to 95%
Input voltage		12 Vdc @ 1.5 A maximum

3G SERBAL™ Part number	
Camera side	PHW.MS.3G4.TFJ4
CCU side	FGW.MS.3G4.TFJ4

Every coax-to-fibre Media Converter comes with power supply (110V/220V) adapter.

## Applications

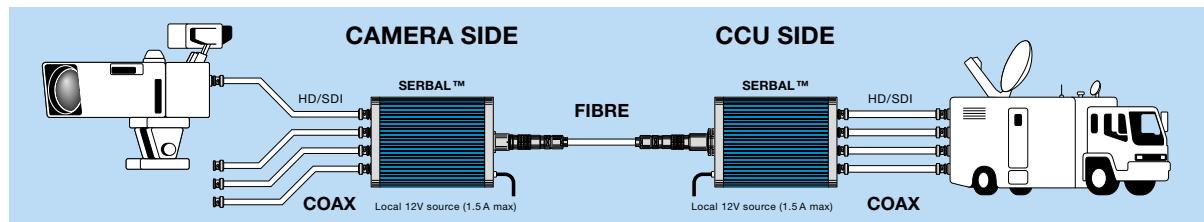

- Golf, skiing, auto racing, olympic games
- Pre-fibred venues
- Stadiums, racing tracks
- 4K video compatible

## Advantages

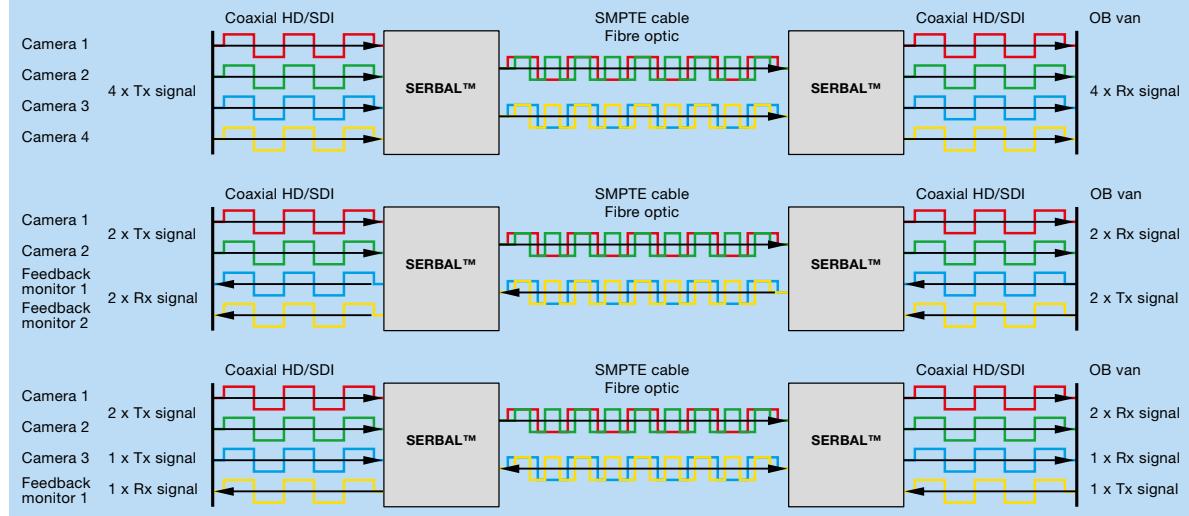

- Plug & play solution
- High quality signal transmitted over fibre
- Compact

## Features

- Converts from Coaxial BNC input to transmission over standard 3K.93C cable assemblies
- Audio/Data:  
passes pre-embedded Audio
- Each channel supports all SDI video formats from 270 Mb/s to 2.97 Gb/s
- Signal format:  
SMPTE 424M, SMPTE 292M and SMPTE 259M compliant DVB-ASI at 270Mb/s.

## Automatic configuration

## LEMO HEADQUARTERS

### SWITZERLAND
